SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	02/20/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No.	Applicant(s)	
	10/691,821	GRAEBE, WILLIAM F.	
	Examiner	Art Unit	
	Sunil Singh	3673	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-30 and 32-36 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-23 and 34-36 is/are allowed.
- 6) ☒ Claim(s) 24-30, 32 and 33 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

The restriction requirement in the previous office action has been withdrawn.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 24-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Graebe, Jr. '313. in view of Jay (US 4726624)

Graebe, Jr. discloses an air cushion control system comprising an air chamber sensor (34) including an air chamber (see Fig. 1), a bottom out sensor (80,88), and an overinflation sensor (82,90), an air pump (40) to inflate the air chamber, an air valve (52,62) to release air from the air chamber, means (46,50,54,58) to connect the air cushion control system to an air cushion (see col. 3 line 35+) and a microprocessor (74) to control the inflation and the release of the air from the air chamber. A housing (30,12). An alarm is sounded when in the bottom-out condition (col. 4 line 15). Graebe, Jr. discloses the invention substantially as claimed. However, Graebe is silent about the distance from an edge of the air chamber sensor to an end of the channel wall does not exceed one half of the distance between the channel walls. Jay teaches the distance from an edge of the air chamber sensor to an end of the channel wall does not exceed one half of the distance between the channel walls (see Fig. 3, (34), see col. 7).

Art Unit: 3673

It would have been considered obvious to one of ordinary skill in the art to modify Graebe, Jr. by making the distance from an edge of the air chamber sensor to an end of the channel wall does not exceed one half of the distance between the channel walls as taught by Jay in order to control the volume of filling material.

3. Claims 28-30, 32, 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Graebe, Jr. '313. in view of Johnson (US 5450638)

Graebe, Jr. discloses an air cushion control system comprising an air chamber sensor (34) including an air chamber (see Fig. 1), a bottom out sensor (80,88), and an overinflation sensor (82,90), an air pump (40) to inflate the air chamber, an air valve (52,62) to release air from the air chamber, means (46,50,54,58) to connect the air cushion control system to an air cushion (see col. 3 line 35+) and a microprocessor (74) to control the inflation and the release of the air from the air chamber. A housing (30,12). An alarm is sounded when in the bottom-out condition (col. 4 line 15). Graebe, Jr. discloses the invention substantially as claimed. However, Graebe is silent about including support strips in his air channels. Johnson teaches support strips in air channels (see Fig. 3). It would have been considered obvious to one of ordinary skill in the art to modify Graebe Jr. to include support strips as taught by Johnson in order to increase the durability of the structure.

Allowable Subject Matter

4. Claims 1-23, 34-36 are allowed.

Conclusion

Art Unit: 3673

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sunil Singh whose telephone number is (571) 272-7051. The examiner can normally be reached on Monday through Friday 10:30 AM - 7:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Engle Patricia can be reached on (571) 272-6660. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
